

TAKS Objective 4
TEK A.7C
Tutorial
(Grades 9, 10, and 11)

...interpret and determine the reasonableness of solutions to linear equations and inequalities.

This objective will include problems in which you are asked to find solutions.

You may be given an equation, an inequality, a pattern, or a scenario and asked to answer the question.

Read the question carefully.
Then plug in information as
needed and into the correct slots.

Answer the question.

Check your answer by reading the
question to make sure you are actually
answering the question.

NOTE:

These types of questions may require you to perform work with each answer choice in order to find the best answer.

Take your time and do the work.
Then choose the best answer.
